INTRODUCTION

"Hawaii Income Patterns – Individuals 2005" is the forty-eighth edition of an annual summary of financial data on taxpayers subject to Hawaii's Individual Income Tax. The bulk of the data are from Hawaii State individual income tax returns filed by residents and nonresidents, but data from federal income tax returns were used for some items not available on Hawaii returns.

Data are presented for all resident and nonresident taxpayers. The term "nonresident" as used in this report includes part-year residents. Brief sections provide separate data on elderly taxpayers; on blind, deaf or totally disabled taxpayers; and on taxpayers who are claimed as dependents.

HAWAII INCOME PATTERNS - 2005 INDIVIDUALS

OVERVIEW

Residents and nonresidents filed a total of 622,149 Hawaii income tax returns for the 2005 tax year. Among the major sources of income that were reported, salaries and wages increased by 17.0% over the amount in 2004, net capital gains increased by 47.8%, pensions and annuities fell by 2.0%, and interest income rose by 15.1%. Hawaii adjusted gross income (AGI) amounted to \$26,944 million, up 11.4% from \$24,195 million in 2004.

In tax year 2005, income tax liabilities increased by 13.5% before credits and by 13.1% after credits.

| Taxable Income | 21,384,256 | 19,136,615 | 11.7 | | | |
| Tax Liability Before Credits | 1,408,741 | 1,241,606 | 13.5 | | | |
| Tax Liability After Credits | 1,302,772 | 1,152,311 | 13.1 | | | |

¹In 2004, various components (such as salaries and wages) were low relative to 2005, in part because there was a significant amount of funds from unknown sources in 2004.

²Includes negative adjusted gross income.

CONFORMITY WITH THE INTERNAL REVENUE CODE

The State Legislature regularly conforms Hawaii's income tax law to adopt most of the changes in the Internal Revenue Code. However, there are a number of differences between the income tax laws of Hawaii and those of the federal government. The main differences in individual income taxes are that the federal government taxes social security benefits, many pension distributions, interest on U.S. savings bonds, contributions made to a Hawaii individual housing account, and the first \$2,594 in national guard duty or military reserve pay, whereas Hawaii does not. On the other hand, Hawaii taxes cost-of-living allowances of federal civilian employees in Hawaii, employee contributions to the Hawaii state government retirement system, and interest on state and local government bonds issued by jurisdictions outside of Hawaii, whereas the federal government does not.

Unlike the federal government, Hawaii allows an extra personal exemption for taxpayers who are at least 65 years of age. Hawaii's personal exemption is only \$1,040, although a person who is blind, deaf or totally disabled can claim an exemption of \$7,000. The federal personal exemption was \$3,200 in 2005.

LEGISLATION

During 2005, the Hawaii legislature enacted several measures related to individual income taxes. Act 60, Session Laws of Hawaii (SLH) 2005, adopted some of the changes that were made in the federal Internal Revenue Code in 2004. For the most part, these were technical changes that did not have much impact on tax liabilities of Hawaii residents. The legislature also enacted a measure to encourage nurses to enroll in higher education programs by establishing a nursing scholarship and exempting scholarships from taxable income (Act 116, SLH 2005), a measure to close a loophole that allowed a single member limited liability company (LLC) to escape Hawaii Real Property Act withholding on the sale of real property in Hawaii (Act 23, SLH 2005), and a measure to encourage developers to build affordable housing by increasing the low-income housing tax credit (Act 196, SLH 2005).

DATA SOURCE AND METHODOLOGY

Data for this report were collected from the Department of Taxation's Integrated Tax Information Management System (ITIMS), which provides data in electronic form. Data from the ITIMS Tax Processing System (ITPS) were retrieved for returns processed *prior to December of 2006*. (The due date for 2005 returns with extensions was October 20, 2006.) Supplemental data were extracted from the federal Individual Master File and Individual Return Transaction File (IMF/IRTF) provided by the Internal Revenue Service (IRS).

A total of 622,149 returns were processed for tax year 2005. Of this total, a stratified random sample of 60,425 returns was selected for this study. The sample was stratified by Hawaii AGI for residents and by worldwide AGI for nonresidents. Sampling rates ranged from 4.9% of the returns with a low but positive AGI, to 100% of the returns with a very large positive or negative AGI. Table 2 displays the sampling rates by AGI and by type of return.

¹ Hawaii AGI for N-11, N-12, and N-13; worldwide AGI for N-15.

Data from resident returns were merged with the data set of federal returns to obtain additional information on such items as income sources and adjustments to income. The stratified random sample used in this study was derived from this merged data set. A small part of the sample could not be matched electronically with the federal data for 2005, because the federal data set was finalized while resident return data were still being collected. The unmatched returns were either matched manually with paper copies of the federal returns from the same year (if they were attached to the Hawaii return), or electronically with the federal returns from the previous year.

Form N-15 filed by nonresident taxpayers was not merged with the federal data set, mainly because the federal data set includes only those returns with Hawaii addresses, and Form N-15 filers often have addresses outside of Hawaii. Therefore, some details on income sources are not available for nonresident returns.

All returns in the sample data set were edited for errors, using the paper copies of the returns. If the information could not be gleaned from the paper copy, the discrepancies were reported as "unknown income" or "unknown adjustments."

² Returns with individual housing accounts or casualty & theft losses.

Some of the statistics contained in this report are broken down by the four taxation districts of Hawaii: the First Taxation District (the island of Oahu), the Second Taxation District (the islands of Maui, Molokai and Lanai), the Third Taxation District (the island of Hawaii) and the Fourth Taxation District (the islands of Kauai and Niihau).

TYPES AND NUMBER OF RETURNS FILED

Generally, an individual must file a Hawaii income tax return if his or her Hawaii gross taxable income exceeds the sum of the standard deduction and the personal exemption. However, any person doing business in Hawaii must file a return, regardless of the amount of net income. Many individuals who were not required to file a return nevertheless chose to do so in order to claim one or more of the tax credits offered.

A dependent taxpayer whose unearned income is \$500 or more, or whose gross income is greater than the applicable standard deduction amount, must also file a return. If the dependent's income is derived solely from interest and dividends and is between \$500 and \$5,000, and if the dependent is under age 14, then a parent may file Form N-814, ("Parent's Election to Report Child's Interest and Dividends") for the dependent.

Individual taxpayers generally must file one of the following four income tax forms:

- Form N-11 generally for Hawaii residents who file a federal income tax return. This form uses federal adjusted gross income as the starting point for calculating Hawaii taxable income.
- Form N-12 generally for Hawaii residents who do not file a federal income tax return and do not qualify to use Form N-13.
- Form N-13 for Hawaii residents with taxable income below \$100,000 and who do not itemize deductions or claim adjustments to income. Taxpayers who itemize deductions or claim adjustments to income must use Form N-11 or Form N-12.
- Form N-15 for part-year residents and nonresidents.

Table 3 displays the number of returns processed in tax years 2004 and 2005. The number of returns increased by 2.7% (16,087 returns) in 2005. Eighty-one percent of taxpayers chose to file Form N-11. The number of Form N-11 returns filed grew by 8,592, the number of Form N-12 returns filed grew by 2,490, and the number of Form N-13 returns fell by 721. The number of Form N-15 returns increased by 5,726.

The distribution of returns by filing status has remained stable over the years. The most common filing status among resident taxpayers was single, whereas joint returns were most common among nonresident taxpayers. As shown in Table 4, 50.2% of residents

claimed single status, followed by 37.7% joint filers; nonresidents, on the other hand, had 51.3% joint filers, followed by 38.7% single filers.

RESIDENT RETURN STATISTICS

Figure 1 shows the major components of resident returns for the 2005 tax year.

Resident Income and Adjustments

Residents reported total income of \$28,000 million on their federal income tax returns for 2005, but they reported only total income of \$25,244 million on their Hawaii income tax returns for the same year. Of the income reported on the Hawaii income tax returns, salaries and wages was the largest category amounting to \$20,479 million and accounting for 73.1% of the Hawaii total income. The second largest category, pensions and annuities, amounted to \$2,176 million and accounted for 7.8% of the total. Table A4 in the "Appendix Statistical Tables" section of this report presents the types and amounts of income sources by AGI class.

Proprietors filing Schedule C for federal Form 1040 reported net income totaling \$906.5 million, representing a 6.5% increase over the previous year, although net sales of capital assets (also reported on Schedule C) jumped 43.7% to \$1,729.7 million. Net income from rents and royalties (reported on Schedule E for federal Form 1040) grew 23.4% from \$84.5 million in 2004 to \$104.3 million in 2005, whereas partnership income (also reported on Schedule E) increased 32.9% to \$710.0 million. Unemployment compensation dropped 31.8% from \$86.9 million in 2004 to \$59.2 million in 2005.

Federal AGI is the starting point for calculating Hawaii taxable income on Form N-11, so for residents filing this form, total Hawaii gross income was derived by adding items taxed by Hawaii but not by the federal government, and then subtracting items taxed by the federal government but not by Hawaii. Some of the items that were added to the federal AGI are cost-of-living allowances (COLA) for federal employees, contributions to the State employees' retirement system (ERS), and interest on out-of-state bonds. Some of the items that were subtracted from the federal AGI include social security benefits and certain pensions. Items added to the federal AGI totaled \$523.2 million, whereas the items subtracted totaled \$3,278.7 million. These adjustments account for the bulk of the difference between total income reported by Hawaii residents on their federal and Hawaii income tax returns.

The number and amounts for each type of adjustment are listed in Table 5. Hawaii total adjustments amounted to \$297.2 million. As shown in Table 5, the top two adjustment amounts were claimed by self-employed taxpayers—self-employed retirement plans and self-employment tax.

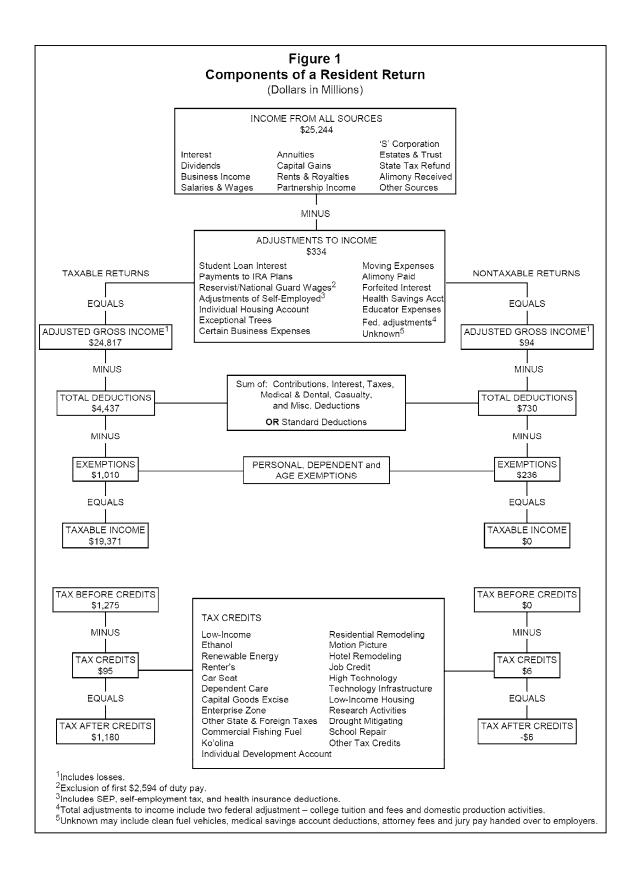

Table 5
Adjustments to Income on Resident Returns

| | Number of | |
|--|-----------|-------------|
| Type of Adjustment | Returns | Amount (\$) |

| Domestic Production Activities (federal only) | 87 | 1,191,571 |

¹Includes the Federal Medical Savings adjustment.

Hawaii AGI on taxable returns amounted to \$24,817 million in 2005, increasing 9.2% from the \$22,805 million in 2004. The median AGI for all resident returns advanced by 4.5% from \$24,704 in 2004 to \$25,826 in 2005, while the median AGI reported on taxable resident returns increased by 4.2%. Table 6 shows the median adjusted gross income on resident returns by status, taxation district and year.

Resident Deductions and Personal Exemptions

Taxpayers may choose to itemize their deductions rather than take the standard deduction. Itemizers may deduct from adjusted gross income part of their medical and dental expenses, certain taxes paid, interest expenses, charitable contributions, casualty and theft losses, and other miscellaneous expenses. Some of these deductions have limitations. Only the part of medical and dental expenses over 7.5% of AGI is deductible; certain miscellaneous deductions are limited to amounts over 2% of AGI, while casualty and theft losses are limited to amounts over 10% of AGI.

²College tuition and fees is an adjustment on Form 1040.

| STATE | 32,371 | 31,064 | 63,439 | 60,776 | 22,949 | 21,719 |

¹Includes returns with AGI losses.

Taxpayers with AGI more than \$100,000, (or more than \$50,000 if married and filing separately) are required to reduce their itemized deductions by the smaller of 80% of certain itemized deductions or 3% of the amount by which AGI exceeds the \$100,000 (or \$50,000) threshold.

Taxpayers who choose not to itemize their deductions may subtract the standard deduction from their adjusted gross income. The standard deduction is based on the taxpayer's filing status, as listed below:

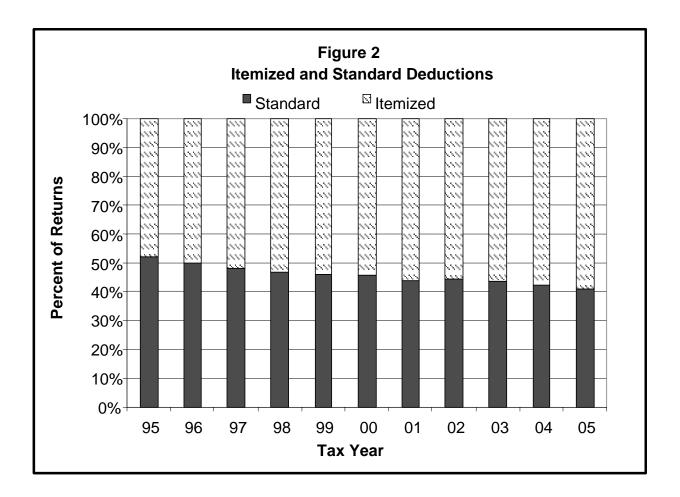

The standard deduction for dependent taxpayers is limited to the greater of \$500 or their earned income (up to the full standard deduction for their filing status). In most cases, dependent taxpayers claim single status, and the corresponding maximum standard deduction is \$1,500.

Of the 554,563 residents who filed a return in 2005, 59.3% itemized deductions. The total of the itemized deductions was \$4,817.5 million. The remaining 40.7% of residents claimed the standard deduction in 2005. The total of the standard deductions was \$349.6 million.

As illustrated in Figure 2, the percentage of taxpayers using the standard deduction has steadily declined over the past eleven years, from 51.7% in 1995 to 40.7% in 2005, perhaps because Hawaii's standard deduction has not been adjusted for inflation. The standard deduction for federal income tax returns increased again in 2005, but Hawaii

²Includes single, married filing separately, heads of households, and qualifying surviving spouses.

has made only three changes since 1982. Prior to 1982, the standard deduction was equal to 10% of AGI, up to a maximum \$1,000 for those filing a joint return, or \$800 for single or head-of-household filers.

As shown in Table 7, total allowable deductions in 2005 amounted to \$5,167.1 million. Itemized deductions amounted to \$4,817.5 million in 2005 or 93.2% of the total allowable deductions. The remaining 6.8% was composed of standard deductions. Itemized deductions not allowed totaled \$165.7 million.

| Charitable Contributions | 257,589 | 78.4 | 614,897 | 12.3 |
| Medical | 77,880 | 23.7 | 343,460 | 6.9 |
| Casualty & Theft | 829 | 0.3 | 9,726 | 0.2 |
| Miscellaneous | 126,899 | 38.6 | 421,019 | 8.4 |
| Total Itemized Deductions | 328,684 | 100.0 | 4,983,214 | 100.0 |
| Total Unallowed Deductions | 48,442 | | 165,669 | 3.3 |
| Allowable Itemized Deductions | 328,684 | | 4,817,545 | 96.7 |

NOTE: Totals may not add up due to rounding.

Taxes continue to be the most commonly claimed deduction, followed by charitable contributions. The highest amount claimed, however, was for interest deductions. Smaller numbers of taxpayers qualified for the deductions for medical and dental expenses, casualty and theft losses, and certain miscellaneous expenses.

Each taxpayer, spouse, and qualified dependent is allowed a personal exemption of \$1,040. Taxpayers or spouses 65 years of age or older are allowed an additional personal exemption of \$1,040. A taxpayer who is claimed as a dependent on another taxpayer's return cannot claim a personal exemption on his or her own return.

Blind, deaf, or totally disabled taxpayers are allowed a special personal exemption of \$7,000 in lieu of the regular personal exemptions. If the spouse is also disabled, the total allowable exemption amount is \$14,000.

For tax year 2005, a total of 1,171,759 exemptions (including the age exemption) were reported on 521,106 resident returns for an average 2.2 exemptions per return. The total exemption amount claimed was \$1,246.4 million.

Resident Taxable Income and Tax Liability

Subtracting deductions and personal exemptions from AGI yields taxable income. Nearly 83% of all resident returns reported taxable income in 2005. The total taxable income was \$19,370.6 million, which is \$1,664.0 million more than reported in 2004. The average taxable income for returns with a positive tax liability was \$42,142, representing an increase of 8.1% over 2004.

Tax liability is determined by using the tax rate schedule, or the tax table. Gross tax liability before tax credits grew 10.9% from \$1,149.4 million in 2004 to \$1,274.7 million in 2005. The average gross tax liability per taxable return in 2005 was \$2,773. Net tax liability after tax credits for taxable returns that year amounted to \$1,180.3 million, or an average \$2,579 per taxable return.

The average effective tax rate for returns with positive taxable income before credits was 6.6% for 2005. After credits, this tax rate fell to 6.1%. Based on AGI, the average effective tax rate was 5.1% before credits and 4.8% after credits.

NONRESIDENT AND PART-YEAR RESIDENT RETURN STATISTICS

Nonresidents and part-year residents use Form N-15 to file their income tax returns. Sources of income and adjustments are reported on this form for worldwide income and for Hawaii-source income, but the focus of this report is on Hawaii income and adjustments. The term "nonresident" as used in this report includes part-year residents.

The number of Form N-15 filers increased by 5,726, or by 9.3% from 2004 to 2005. Nonresidents and part-year residents made up 10.9% of all returns filed in 2005, compared with 10.2% a year earlier.

Nonresident Income and Adjustments

Nonresidents reported \$2,071.9 million in total income from Hawaii sources in 2005. As shown in Table 8, salaries and wages totaled \$744.3 million, up \$92.9 million from the \$651.4 million reported in the previous year. The nonresident population changes constantly, so income for nonresidents also fluctuates widely from year to year.

Table 8
Sources of Hawaii Income Reported
by Nonresident Taxpayers in 2005 and 2004
(In Thousands of Dollars)

| | | | Increase |
|---------------------------------|-----------|-----------|------------|
| Sources of Income | 2005 | 2004 | (Decrease) |
| TOTAL | 2,071,899 | 1,407,217 | 664,682 |
| Salaries and Wages | 744,285 | 651,388 | 92,897 |
| Interest | 39,257 | 37,757 | 1,500 |
| Ordinary Dividends | 10,301 | 8,774 | 1,527 |
| Capital Assets/Other Property | 1,101,584 | 712,124 | 389,460 |
| Rents, Royalties, Partnerships, | | | |
| S. Corp., Estates and Trusts | 104,315 | 81,568 | 22,747 |
| All Other Sources | 72,157 | (84,394) | 156,551 |

Hawaii AGI of nonresidents amounted to \$2,033.0 million in 2005 (equal to total Hawaii income of \$2,071.9 million less adjustments of \$38.8 million), whereas the worldwide income of these taxpayers was \$37,989.5 million.

Nonresident Deductions and Exemptions

Nonresidents must prorate the standard deductions and exemption amounts to determine their Hawaii taxable income. The prorated amount is the ratio of Hawaii AGI to worldwide AGI. Hawaii AGI, less the prorated exemption amount and less either the Hawaii itemized deductions or the prorated standard deduction, equals Hawaii taxable income.

In 2005, 25,180 nonresident returns used the standard deduction, while 31,866 non-resident returns had allowable itemized deductions. Of the \$382.0 million of prorated itemized deductions claimed by 31,866 nonresidents, \$24.4 million was not allowed. Prorated standard deductions, which were claimed on 25,180 returns, amounted to \$19.7 million. The allowable itemized deductions plus the standard deductions totaled \$377.3 million, which was \$98.0 million more than in 2004. Nonresidents claimed a total of 147,888 exemptions and the prorated exemption totaled \$50.0 million.

Nonresident Taxable Income and Tax Liability

Hawaii taxable income was reported on approximately 75.4% of the returns filed by nonresidents in 2005. The total of their taxable income was \$2,013.6 million. The average taxable income per taxable return was \$39,529. Gross tax liability before tax credits amounted to \$134.0 million and the average gross tax liability was \$2,631 per taxable return. After tax credits, total net tax liability amounted to \$128.8 million, or an average of \$2,519 per taxable return.

ELDERLY RESIDENT TAXPAYERS

Taxpayers 65 years of age or older are defined as elderly and may claim an extra exemption. Accounting for approximately 17.6% of total resident returns, the elderly taxpayers (97,452 returns) reported Hawaii total income of \$2,874.7 million and federal total income of \$4,997.7 million in 2005. The largest income source of elderly filers was pensions and annuities, which made up \$1,438.6 million, or 28.8% of their total federal income, followed by salaries and wages at 28.1%. For non-elderly taxpayers, the largest source of income was salaries and wages, whereas pension and annuities was the third largest, after proprietorship income. Table 9 compares the distribution of income sources of elderly and non-elderly taxpayers.

Elderly taxpayers subtracted \$37.7 million of adjustments from their Hawaii total income, resulting in Hawaii AGI of \$2,837.0 million. Elderly taxpayers claimed \$65.0 million in standard deductions, \$843.5 million in itemized deductions, and \$309.7 million

in personal exemptions, leaving Hawaii taxable income of \$1,618.8 million. The resulting tax liability was \$137.3 million before credits and \$118.5 million after credits.

| All Other Sources ¹ | 50,197 | (756) | 178,482 | 563 |

¹ "All Other Sources" includes unemployment, tax refund income and miscellaneous and unknown income. Note: detail may not add up to total due to rounding.

BLIND, DEAF AND DISABLED RESIDENT TAXPAYERS

Blind, deaf, or totally disabled (BDD) taxpayers may claim a special personal exemption of \$7,000 in lieu of the \$1,040 regular personal exemption. A spouse on a joint return with a disabled taxpayer is entitled to an exemption of \$1,040 plus an additional \$1,040 if the spouse is aged 65 or older. A disabled spouse on a joint return is also entitled to the \$7,000 exemption, so the maximum allowable exemption on a joint return with two disabled taxpayers is \$14,000. Disabled taxpayers may not claim any additional exemptions for dependents or age.

Resident returns with BDD exemptions numbered 5,192 in 2005. BDD taxpayers reported federal total income of \$265.7 million and Hawaii total income of \$183.9 million. Their highest source of income was salaries and wages (\$107.1 million), followed by pensions (\$47.1 million), and net capital gains (\$27.3 million). Their taxable

income was \$78.4 million, and their tax liability before and after credits amounted to \$6.8 million and \$6.1 million, respectively.

DEPENDENT RESIDENT TAXPAYERS

Dependent taxpayers can file their own returns, but they are claimed as dependents by other taxpayers, so they may not claim the personal exemption of \$1,040. Dependents may itemize deductions, or they may claim the standard deduction, which is the greater of \$500 or their earned income (up to the full standard deduction for their filing status).

A total of 33,457 dependents filed returns in 2005, a slight increase over the 33,159 returns filed in 2004. Their Hawaii total income was \$187.8 million, while their federal total income was \$189.3 million. Their major source of Hawaii income was salaries and wages, which amounted to \$172.1 million, or 91.6% of their Hawaii total income. Their adjusted gross income was \$187.3 million. Their taxable income was \$141.8 million, and their tax liability was \$6.1 million before credits and \$5.8 million after credits.

Included in "miscellaneous sources."

² Amounts for pensions and annuities are federally taxable amounts, some of which is not taxable by Hawaii.

³ Residents: federally-taxable sources, including alimony received. Nonresidents: Hawaii-taxable sources, including Schedule E.

⁴ Items not on Hawaii return and federal return not available in IRS data set.

⁵ Does not include individual housing accounts and military reserve/Hawaii national guard duty pay, which are included as statutory adjustments in the last column.

⁶ Excludes adjustments for college tuition which was not adopted by Hawaii.
